MANUFACTURING'S #1 SOURCE

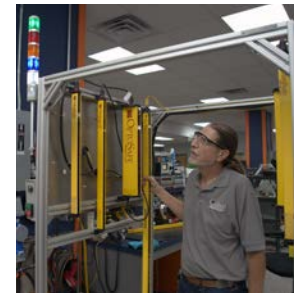

for Repair, Sales & Service of
All Industrial Electronics,
Servo Motors,
AC & DC Motors,
Hydraulics &
Pneumatics

3 TIERED
DYNO
100% TRUE
Load Testing

Custom Engineered Test Stands

Our in-house engineers create
customized plug-and-play test stands
that simulate the repaired units' natural
environment for easy and accurate testing.

Industrial Electronics

Every repair bench is equipped with state-of-the-art test
equipment and a wide range of power capabilities including full
current 3 phase 480V power, ensuring that all repairs are carried
out to OEM specifications.

- Ammeters
- Analog & Digital Oscilloscopes
- ESR / LCR Meters
- EPROM Burners
- Function Generators
- Huntrons
- Load Banks
- Megohmmeters
- PLC Racks
- Precision Multimeters
- & Much More!

Servo Motors

MITCHELL ELECTRONICS

- Test Equipment System
Specializing in Servo Motor
Repair & Maintenance
- Specifically Designed for
Diagnosing & Repairing
Servo Motors
- Tests & Aligns Encoders &
other Feedback Devices

AC & DC Motors

All motors undergo an extensive evaluation prior to any work being performed. Worn or damaged parts & bearings are replaced during the rebuild process.

Rewinding:

In-House Rewinding, Ensuring
Superior Repairs & Complete
Control of Quality & Turnaround

Dynamic Balancing:

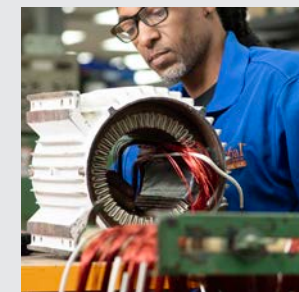

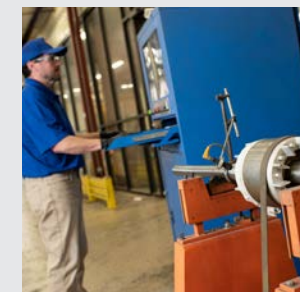

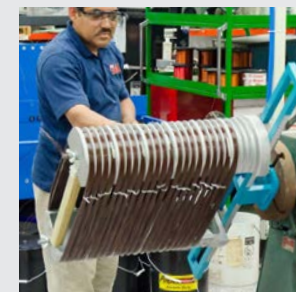

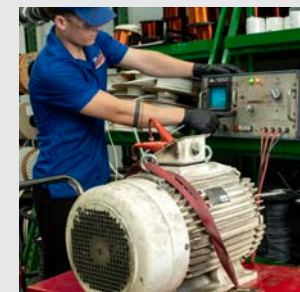

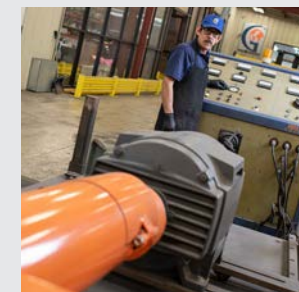

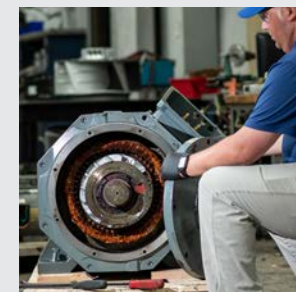

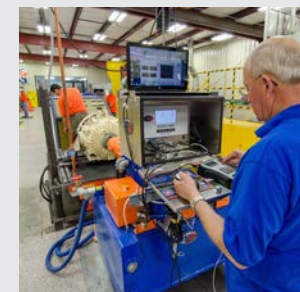

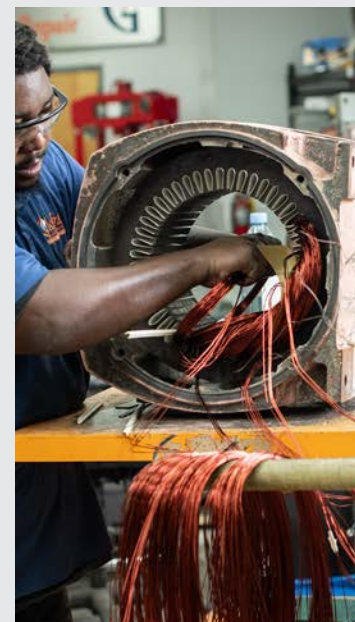

Reduces Vibration, Optimizing
Motor Performance

Dynamometer Testing:

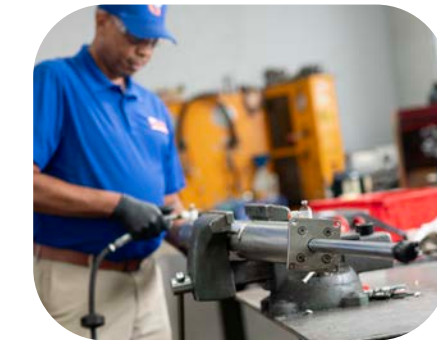

Every Motor is Fully Tested
Using Our Dyno & Motor
Control Center

Machine Shop Services:

Includes Keyway Cutting, Shaft
& Bearing Journal Repairs,
Endbell & Mounting Foot
Repairs

Hydraulics & Pneumatics

Our **HYDRAULIC TEST
STATION** allows us to
Pressure Test up to 10,000 PSI

- Flow Testing
- Hydrostatic Testing
